Sky Light Holdings Limited  
天彩控股有限公司

Stock Code **3882**

Incorporated in the Cayman Islands with limited liability

# Environmental, Social and Governance Report

---

## ABOUT THIS REPORT

This report covers certain environmental and social responsibility aspects underlying Sky Light Holdings Limited (“Sky Light” or the “Company”) and its subsidiaries’ (the Company together with its subsidiaries referred to as the “Group” or “we”) business operations in the People’s Republic of China (the “PRC”) and in the Socialist Republic of Vietnam (the “Vietnam”) for the financial year ended 31 December 2021 (“the Year”) and is prepared with reference to the Environmental, Social and Governance Reporting Guide (“ESG Reporting Guide”) as set out in Appendix 27 to the Rules Governing the Listing of Securities (the “Listing Rules”) on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”).

The Company has complied with the “comply or explain” provisions set out in the ESG Reporting Guide during the Year under review.

This report has been reviewed and approved by the Company’s board of directors (the “Board”).

## Report scope

Taken into consideration of the roles of the operating offices of the Group in Hong Kong and overseas countries where the economic activities do not constitute any significant part of the Group, therefore this report only covers the Group’s sustainability performance and initiatives of our office quarters and manufacturing facilities in Shenzhen and Heyuan, PRC and in Hanoi, Vietnam, unless otherwise stated.

This report supplements our 2021 Annual Report, and discloses our progress on certain environmental and social responsibility aspects from 1 January 2021 to 31 December 2021. For governance section, please refer to our 2021 Annual Report pages 19 to 35. Due to gaps in legal requirements across regions where the Company operates, certain quantitative indicators are not yet applied to some of our subsidiaries. The Company will work to ensure that these indicators are included in one set of unified standard statistics in our future environmental, social and governance reports.

# Environmental, Social and Governance Report

## Reporting principles

The Board upholds the overall responsibility for the Group's ESG reporting and strategising. During its preparation, the Group adheres to the following reporting principles:

Materiality	The Group refers the results of communication with stakeholders, adopts the method of materiality assessment to identify the material issues of the Group during the Year, and then collects relevant materials and data, and compiles this report. Please refer to the section headed "Stakeholder Engagement and Materiality Assessment" below for details in relation to materiality assessment and stakeholder engagement
Quantitative	Disclose the standards and methods used in the calculation of the relevant data in this report, and explain the applicable assumptions therein
Balance	Report information in an objective and unbiased manner to ensure it reflects both the achievements and the challenges faced by the Group
Consistency	Provide relevant explanations on the changes and impacts of disclosure scope and key performance indicators as well as using consistent measurement methods to enable meaningful comparisons of the Group's ESG performance

## How to obtain this Report

The report is published in English and Chinese. In case of any conflicts between the two versions, the English version shall prevail. To be environmental friendly, we do not publish hard copies. The PDF version of this report is available on the website of Stock Exchange (<http://www.hkexnews.hk>) and the website of the Company (<http://www.sky-light.com.hk>).

### Feedback

We welcome your feedback on our reporting for 2021 and any suggestions you have in terms of what you would like to see incorporated in our future reports. To contact us, you may do so at:

Address	: Room 1910, 19/F Kwong Sang Hong Centre, 151–153 Hoi Bun Road, Kwun Tong, Kowloon, Hong Kong
E-mail	: <a href="mailto:ir@sky-light.com.hk">ir@sky-light.com.hk</a>
Fax	: +852 2790 2903

## Sustainability Management at Sky Light

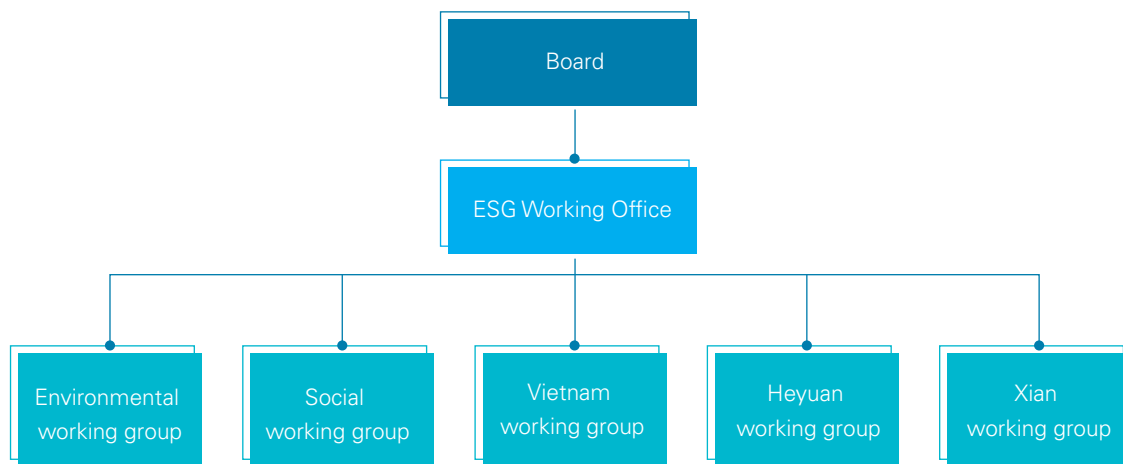

As a worldwide smart imaging total solutions provider, effective sustainability management is an integral part of our business strategy. We are committed to operating in a manner that is economically, socially and environmentally sustainable while balancing the interests of our various stakeholders and providing valuable products to society. Meeting this commitment is an important management objective and the individual and collective responsibility of the Group's employees.

# Environmental, Social and Governance Report

## Environmental, Social and Governance Working Office

Sky Light’s Board supports the ESG Working Office. The development of the ESG policies is the responsibility of the ESG Working Office, which is chaired by Mr. Tang Wing Fong Terry, the chief executive officer of the Group and the chairman of the Board. The ESG Working Office meets regularly and reports directly to the Board.

ESG Working Office incorporate the elements of sustainability into corporate governance, the structure of which is set out as follows:

Parties	Responsibilities
Board	<ul style="list-style-type: none"> <li>Monitors corporate governance practices and procedures; and maintains appropriate and effective risk management and internal control systems of the Group to ensure compliance with applicable rules and regulations</li> </ul>
ESG Working Office	<ul style="list-style-type: none"> <li>Reviews the Company’s ESG strategy, principles and policies</li> <li>Sets guidance and direction of and oversees ESG practices and procedures</li> <li>Promotes ESG plan internally and externally</li> <li>Organizes and implements ESG initiatives</li> <li>Monitors progress on ESG matters and related activities</li> <li>Ensures that the Company operates in a manner that enhances its positive contribution to society and the environment</li> </ul>
Working Group	<ul style="list-style-type: none"> <li>Implement ESG practices and ensure compliance in daily operations</li> </ul>

# Environmental, Social and Governance Report

---

## ***Materiality assessment***

To prioritise relevant sustainability areas that would have a material impact on the Group's operations and reputation, the Group has adopted a three-step process to conduct materiality assessment.

### **Step 1: Identification**

Reviewing the list of sustainability issues identified against the ESG Reporting Guide, peers' disclosures and international reporting standards.

### **Step 2: Prioritisation**

Ranking the identified topics by reference to the respective level of interest, risk and importance to the Group through various stakeholder engagements and generating a list of prioritised material topics based on the Group's understanding of the stakeholders' concerns and requirements as a result of stakeholder engagements.

### **Step 3: Validation**

Reviewing and validating the list of material sustainability topics to ensure that they are relevant and material to the Group for further action and disclosure as appropriate.

## ***Sustainable Development Goals***

We strictly comply with the ESG Guide of the Stock Exchange, we also commit to integrate international well-recognized sustainability measures into our business development and strategies. During the Year, the Company are focusing on the following goals:

1. For the strategic deployment of green and low-carbon transformation, the group will improve the low-carbon operation efficiency of the group's business by updating some low-emission and high-energy-efficiency production equipment.
2. Committed to providing employees with a safe and comfortable working environment and a broad career development platform. To maximize the safety and health of employees, provide skills training, so that employees can gain a sense of achievement and happiness, develop their potential at work, and make contributions to the society.
3. Establish a sound internal control audit system to strictly monitor and deal with bribery. Improve the transparency of company information disclosure, reduce the impact of operating activities on surrounding communities, and provide valuable products to the social.

The Group shall review its short-term goals and disclose the execution progress on an annual basis. If necessary, the Group would adjust and realign these goals with its latest business activities and operations. With an estimated period of three to five years, major advances towards the Group's long-term goals would be expected.

# Environmental, Social and Governance Report

## Stakeholder Engagement and Materiality Assessment

### Material issues

On the basis of fully considering the nature of the business and development strategy, we collected opinions from stakeholders through questionnaires, telephone communication, etc., evaluated and screened important issues during the Year, and submitted the analysis results to the senior management of the Company for review and final confirmation. The material issues of the Company will be highlighted in this report.

### Communication with Stakeholders

We attach great importance to the communication with key stakeholder groups, take the stakeholder's interest in or be affected by the Group's business as a consideration, and incorporate it into the consideration of the Group's operational decisions. During the Year, we identified significant stakeholders of the Group including government and regulatory authorities, shareholders and investors, employees, customers, suppliers and surrounding communities. The following table sets out the issues of concern to each stakeholder group during the Year, and the Group's main communication methods with key stakeholders.

Stakeholder	Issues concerned	Communication Channels
Government and regulatory authorities	<ul style="list-style-type: none"><li>➤ Compliance with statutes</li><li>➤ Anti-Corruption</li><li>➤ Anti-unfair competition</li><li>➤ Employment and Labor Standards</li></ul>	<ul style="list-style-type: none"><li>➤ On-site compliance inspection</li><li>➤ Regular submission of statements</li></ul>
Shareholders/Investors	<ul style="list-style-type: none"><li>➤ Economic performance</li><li>➤ Corporate governance</li><li>➤ Compliance operation</li><li>➤ Anti-Corruption</li><li>➤ Employment and Labor Standards</li></ul>	<ul style="list-style-type: none"><li>➤ Annual general meeting</li><li>➤ Interim and annual reports</li><li>➤ Results announcement</li></ul>
Employees	<ul style="list-style-type: none"><li>➤ Staff welfare</li><li>➤ Labor standard</li><li>➤ Staff Safety and Health</li><li>➤ Staff training and promotion</li></ul>	<ul style="list-style-type: none"><li>➤ Company internal website/email</li><li>➤ Employee satisfaction survey</li><li>➤ Performance assessment</li><li>➤ Staff forum</li></ul>

# Environmental, Social and Governance Report

Stakeholder	Issues concerned	Communication Channels
Customers	<ul style="list-style-type: none"> <li>➤ Product quality and customer service</li> <li>➤ Customer Satisfaction and Complaint</li> <li>➤ Protection of intellectual property rights</li> <li>➤ Protect Consumer Information Security and Privacy</li> </ul>	<ul style="list-style-type: none"> <li>➤ Business visit</li> <li>➤ Email and phone contact</li> <li>➤ Customer satisfaction survey and feedback form</li> </ul>
Suppliers	<ul style="list-style-type: none"> <li>➤ Anti-Corruption</li> <li>➤ Supply Chain Management</li> <li>➤ Protection of intellectual property rights</li> </ul>	<ul style="list-style-type: none"> <li>➤ Suppliers' assessment and management system</li> <li>➤ Supplier meetings</li> <li>➤ Site investigation</li> </ul>
Community/ non-governmental organizations	<ul style="list-style-type: none"> <li>➤ Community Development and Social Welfare</li> <li>➤ Environmental issues</li> </ul>	<ul style="list-style-type: none"> <li>➤ Sponsor community welfare activities</li> <li>➤ Community visits</li> <li>➤ Voluntary events</li> </ul>

## Materiality matrix

Based on the Group's strategic planning and development status, we identified 20 issues. By collecting and evaluating the Group's key stakeholders' opinions on the importance of the issues, we finally identified 12 important issues. These issues will be important considerations for the future direction of the Group's sustainable development, and are also key disclosures in this report.

# Environmental, Social and Governance Report

## Environmental Issues

- 1 Resource Management
- 2 Air Emissions
- 3 Greenhouse Gas Emission
- 4 Sewage Discharge
- 5 Waste Management
- 6 Water Resources Management
- 7 Packaging Material Consumption
- 8 Protect the Environment and Natural Resources
- 9 Impact of Climate Change on Business

## Social Issues

- 10 Staff Occupational Health and Safety
- 11 Employment and Labor Standards
- 12 Staff Training and Development
- 13 Supply Chain Management
- 14 Product Quality and Customer Service
- 15 Customer Satisfaction and Complaint Handling
- 16 Respect and Protect Intellectual Property
- 17 Protect Consumer Information Security and Privacy
- 18 Anti-Corruption
- 19 Anti-unfair Competition
- 20 Community Development and Social Welfare

## ENVIRONMENTAL PROTECTION

The Group do not involve major environmental contamination risk. As the manufacturing facilities are based in the PRC and the Vietnam, we strictly follow the Environmental Protection Law of the PRC, the Environmental Impact Assessment Law of the PRC, the Water Pollution Prevention and Control Law of the PRC, the Law of the PRC on the Prevention and Control of Environmental Pollution by Solid Waste, and the Law of the PRC on the Prevention and Control of Air Pollution, the Law of the PRC on the Prevention and Control of Environmental Noise Pollution, the Environmental Protection Law of Vietnam (Law No. 72/2020/QH14), the Law on the Promotion of Effective Utilization of Resources (Law No. 50/2010/QH12) of Vietnam, etc., and other relevant emission standards, implementation plans, management regulations and technical guidelines, etc.

With a view to complying with the relevant environmental laws and regulations and minimising the impact on the environment arising from the Group's business operations, the Group has developed and implemented an Environmental Management Program ("EMP") for the purpose of identifying aspects of the Group's operations ("Aspects") that may have significant impact on the environment in light of applicable laws and otherwise. For example: "Hazardous Chemicals Management Policy", "Sewage Discharge Control Program", "Exhaust Noise Control Program", "Waste Control Program".

Under the EMP, representatives from each operational department and business unit within the Group will meet yearly with the Group's ESG Working Office to review its key processes and identify possible Aspects underlying the operation of such department. The Group's department heads will then discuss with the ESG Working Office regarding any significant Aspects identified, and design measures aiming at reducing the environmental impacts arising from such Aspects. These measures will be documented and the related staff will be provided with suitable training, with ESG Working Office's supervision and reporting to the Board from time to time to ensure effective implementation.

During the Year, no non-compliance with relevant laws and regulations that have a significant impact on the Group relating to air and greenhouse gas emissions, discharges into water and land, generation of hazardous and non-hazardous waste had been identified.

# Environmental, Social and Governance Report

## Emissions and Waste Generation

### *Waste*

The Group generates non-hazardous wastes such as metallic frames from forming process, paper from product packaging and office use, plastic by-products such as plastics nozzles clogs and injection molding defects from the production process and plastic containers and glass bottles for storage of raw materials before utilisation. These non-hazardous wastes are mostly recyclables and collected by licensed recycling companies.

In addition, the Group generates certain hazardous wastes such as containers for machine oil and oil paint, organic solvents, industrial alcohol, machine oil, etc. from the production process. During the Year, the Group has engaged licensed waste disposal service providers to process the hazardous wastes.

Through the implementation of the measure, we target to reduce 5% wastes from 2022 onwards.

### *Air Emissions*

Air emissions are principally emitted from (i) motor vehicles for the transportation of products and personnel and (ii) forklifts for inter-plant transportation. The Group owns 5 motor vehicles which are used as product transportation and for other business uses and 3 forklifts for inter-plant transportation.

### *Sewage Discharge*

The Group did not receive any notification regarding sewage discharge violation during the Year. The Group believes that the discharged sewage does not pose material impact on the surrounding environment which is different from that posed by local domestic sewage discharges.

### *Greenhouse Gases (GHG) Emissions*

The main sources of greenhouse gas emissions could be categorised into two scopes:

- Scope 1. Direct emission due to the diesel and gasoline consumed by motor vehicles and forklifts transported within the plant. During the soldering process in the camera manufacturing, reflow waste gas was generated. Although the volume is immaterial, such waste gas will be collected and exhausted by a funnel via turbine extraction.
- Scope 2. Indirect emission due to the consumption of electricity during the operations at the factory, especially carbon dioxide.

Although the Group believes these emissions do not have a significant adverse effect on the environment, we set a target from 2022 onwards, maintain the GHG emission intensity below the 2021 baseline value.

# Environmental, Social and Governance Report

## **Measures undertaken to reduce emissions and wastes**

With a view to minimising the environmental impact brought by these emissions and wastes, the Group has adopted the following measures during the Year to supplement its EMP:

1. Implementing clear guidelines as to business uses and maintenance of corporate vehicles, recording and monitoring the consumption of fuel on a continuing basis so as to enhance efficiency in their deployment and reduce emissions. The Group advocates less vehicle utilization, and encourages employees to go to work by carpooling and on bicycle or green walking. Furthermore, the Group's corporate vehicles are inspected regularly at government's designated inspection sites to ensure adherence to the prevailing emission standard, and vehicles not conforming to exhaust emission requirements will not be used.
2. Understanding better the Group's suppliers and subcontractors and taking into account their environmental and social responsibility practices in the selection process. Please refer to the subsection headed "Social Responsibility Operational Practices — Supply Chain Management" below in this ESG Report for further details.
3. Continuing to commission hazardous wastes to licensed waste disposal service providers, which will further process these wastes for reuse/storage. As for the non-hazardous wastes, the Group has adopted a waste classification approach and inspired its employees to make a positive impact on the minimization of daily waste by bringing their own lunch boxes to reduce plastic waste.
4. The Group also promotes the "3R" Program which aims at minimising, to the extent practicable, the amount of wastes produced during the course of the Group's business operations. The term "3R" represents:
  - (a) Reduction — reducing the volume of relative toxicity of wastes generated to the extent practicable, by using alternative materials, processes and procedures;
  - (b) Reuse — reusing wastes generated and returning unused materials such as plastic containers and packaging cartons; and
  - (c) Recycling — converting waste materials into usable materials or extracting useful substances from them, such as recycling scrap metal, packaging material and paper.
5. Periodically arranging environmental compliance inspections to ensure the Group's compliance with the applicable local environmental laws and regulations relating to the Group's operations. The Group has commissioned independent environmental inspections at its factory site in Shenzhen and Hanoi in this year, as regards its compliance with applicable regulations on effluents, emissions and noise. The Group's production facility in Shenzhen and in Hanoi has been certified by the inspecting agencies for compliance with the relevant environmental standards, benefiting from which the Group had not experienced any material environmental incidents arising from its manufacturing activities. No material administrative sanctions or penalties were imposed on the Group during the Year.
6. In order to reduce greenhouse gas emissions, the Group has adopted measures to save energy and reduce consumption, such as limiting the temperature of air conditioners to 26°C and controlling the on and off time of air conditioners and lighting equipment; phase out high energy-consuming equipment, and replace energy-saving equipment. To reduce the consumption of electricity, please refer to the "Resource Consumption — Electricity" section of this report for further details.

# Environmental, Social and Governance Report

## Emissions data performance table

Key Performance Indicators	Unit	Year 2021	Year 2020
<b>Air Emissions</b>			
Nitrogen oxides (NOx)	tonnes	0.17	0.30
Particulate matters (PM)	tonnes	0.016	0.006
Intensity of emission	tonnes/million HK\$ revenue	0.00022	0.00070
<b>Greenhouse Gases Emissions</b>			
Scope 1 Direct emission	tonnes of CO <sub>2</sub> e	62.71	60.67
Scope 2 Indirect emission	tonnes of CO <sub>2</sub> e	7,120.90	6,889.23
Total of GHG emission (Scope 1 + Scope 2)	tonnes of CO <sub>2</sub> e	7,183.61	6,949.90
Intensity of GHG emission	tonnes of CO <sub>2</sub> e/million HK\$ revenue	10.0	15.9
<b>Waste discharge</b>			
Output of non-hazardous waste	tonnes	111.9	194.2
Intensity of non-hazardous waste output	tonnes/million HK\$ revenue	0.16	0.40
Output of hazardous waste	tonnes	3.9	0.8
Intensity of hazardous waste output	tonnes/million HK\$ revenue	0.0055	0.0018

Notes:

1. In 2020, the GHG emissions only report aggregated data, and do not distinguish between Scope 1 and Scope 2. For clarity, they will be reported separately in 2021.
2. Intensity of emission is calculated using the total emission in tonnes divided by revenue per million Hong Kong dollars for the Year.
3. The main sources of GHG emissions (Scope 1) are diesel and gasoline, and the GHG emissions (Scope 2) are consumption of electricity. The calculation of greenhouse gas emissions refers to the "Guidelines for Compiling Provincial Greenhouse Gas Inventories" issued by the National Development and Reform Commission of the PRC.

## Resources Consumption

The Group recognises the importance of efficient resources consumption and continuously aims at streamlining its operations with a view to developing an energy-efficient culture. The principal types of resources utilised by the Group in its business operations during the Year, and the measures undertaken by the Group to promote efficient usage are discussed below:

# Environmental, Social and Governance Report

## **Electricity**

Electricity is necessary for each stage of the Group's production process and is the main source of energy used. The Group has adopted an internal policy to promote conservative energy uses for many years. Under the policy, the usage of electricity in different departments is continuously monitored and there are clear guidelines on the operating hours/energy-saving measures in respect of electrical appliances such as office equipment and lighting and air conditioning facilities. For example, for energy conservation, lightings in stairwells are switched off during daytime when there is sufficient light, electrical appliances with high energy consumption characteristics are modified to the extent practicable to improve energy efficiency, LED lights are used in offices and workshops, and the temperature of air conditioner is set at 26°C or above etc. In addition, energy consumption efficiency of electrical appliances will also be taken into account when purchases are being considered. Compared with 2020, the electricity usage has decreased due to the implementation of these measures and the Group targets to maintain the electricity usage with such low level from 2022 onward.

## **Fuel Oil**

Apart from transportation of products via logistics companies, the Group also utilises 5 motor vehicles (2020: 5) as product transportation back-up and for other business uses. The Group also maintains 3 forklifts (2020: 3). Fuels consumed by the Group during the Year were all consumed by motor vehicles. Promote efficient use of company vehicles by taking relevant measures.

## **Water**

The Group's production process does not involve high level of water consumption as the water employed in cooling processes and waterproof testing processes can be re-used in the same production process. Save as aforesaid, all water resources are consumed by employees in the factory quarters and the staff's dormitories in the PRC and the Vietnam.

Currently, water resources supply comes from the local government via its domestic water supply and the Group has not encountered any difficulty in procuring such water supply during the Year. The Group has adopted internal guidelines and provides staff education to promote water conservation, such as

- place "SAVE WATER" posters and banners at the water using areas to remind staff;
- advocate the importance of water conservation for new employee during orientation briefings;
- build dual flush toilets system in the company;
- routinely inspects and upkeeps water supply facilities.

To further ensure quality of water supplied for staff use, the Group has also adopted clear guidelines regarding sanitisation and filtration in water supply and storage facilities.

Compared with 2020, the water usage has decreased due to the implementation of these measures and the Group targets to maintain the water usage with such low level from 2022 onward.

# Environmental, Social and Governance Report

## *Packaging Materials for finished goods*

When designing products, one of the top issues of concern is the products' environmental impact. The Group employs an environmentally friendly approach that accommodates with both design and sustainability concepts. While satisfying the customers, the Group is proactively sourcing renewable materials that meet all of its environmental requirements.

In addition, the Group encourages operational staffs to prioritize materials reuse. Some of the packaging materials such as cardboard boxes and wooden crates are utilized to the maximum extent. In the effort to operate with maximum efficiency, the data collection scope has been expanded to capture the data of packaging used for the finished products. This helps the Group to efficiently manage its resources and prompts the Group to explore alternative packaging solutions.

## *Resource consumption performance table*

Key Performance Indicators	Unit	Year 2021	Year 2020
<b>Direct Energy Consumption</b>			
✧ Diesel	tonnes	0.15	0.12
✧ Gasoline	tonnes	10.57	21.73
Total Direct Energy Consumption	MWh	462.2	942.2
<b>Indirect Energy Consumption</b>			
✧ Purchased Electricity	MWh	8,510	7,000
Total Energy Consumption (Direct & Indirect)	MWh	8,972.2	7,942.2
Energy Consumption Intensity	MWh/million HK\$ revenue	12.6	18.2
<b>Water Usage</b>			
Water Consumption	tonnes	42,252	31,366
Water Consumption Intensity	tonnes/million HK\$ revenue	59.1	71.7
<b>Packaging Materials Usage</b>			
Packaging Materials Consumption	tonnes	4,931	12,400
Packaging Materials Consumption Intensity	tonnes/million HK\$ revenue	6.7	28.4

# Environmental, Social and Governance Report

## Notes:

1. In 2020, we have only reported the aggregated amount of energy consumption, and did not distinguish the direct and indirect energy consumption. For the sake of clarity, it will be reported separately in 2021.
2. Energy consumption is measured in MWh. Direct energy types include diesel and gasoline, and indirect energy types include purchased electricity. Energy consumption is calculated in megawatt hours, and its calculation is based on the General Principles of Comprehensive Energy Consumption Calculation GB/T 2589-2020 issued by the National Energy Fundamentals and Management Standardization Technical Committee of the PRC. The 2020 figures are also recalculated in this way.
3. The consumption intensity is calculated using the total volume divided by the revenue in million Hong Kong dollars for the Year.
4. Due to the substantial reduction in the use of wooden pallets for shipments in 2021, the usage and consumption intensity of packaging materials dropped significantly.

During the Year, to the best of the Directors' knowledge, the Group did not receive any complaint from its customers or any other parties in respect of any environmental protection issues, and had not experienced any material environmental incidents arising from its manufacturing activities. During the Year, no material administrative sanctions or penalties were imposed upon the Group for the violation of environmental laws or regulations which had an adverse impact on its operations.

## The Environment and Natural Resources

According to the relevant environment laws and regulations of the PRC and Vietnam, and the inspection reports of independent environmental inspection agencies, the Group believes that its production and business operation activities do not have a significant impact on the environment and natural resources. The Group has disclosed different ways and strategies above to reduce environmental impact brought by the business operation.

## Climate Change

Climate change is among the most pressing global challenges of our time. Acute physical risk can arise from extreme weather conditions such as flooding and storms and chronic physical risk can arise from sustained high temperature, while transition risk may result from the change in environmental-related regulations or change in customer preferences.

To minimize life, property and financial losses, precautionary measures on flexible working arrangement have been taken by the Group under different extreme weather scenarios of extreme heat and flooding. Though climate change and aforesaid extreme weather conditions do not directly impose significant threat to the Group's business operations, the effects of global climate change harm the wellbeing and stability of countries and people on earth. However, we will continue to monitor the climate-related risks and implement relevant measures to minimize the potential impact of climate change.

# Environmental, Social and Governance Report

---

## EMPLOYMENT AND LABOR PRACTICES

The Group believes that its employees are indispensable in its achievement of success, and is committed to ensuring the health, safety and general welfare of its employees at work. In addition, the Group provides various job-related seminars, workshops and training courses for the employees' continuous development.

### Employment

The Group strictly complies with relevant laws and regulations regarding employment and labor protection, including but not limited to the Labor Law of the PRC, the Labor Contract Law of the PRC, Social Insurance Law of the PRC, the Prohibition of Child Labor of the PRC, the Law of the PRC on the Protection of Women's Rights and Interests, Law on Social Insurance (No: 58/2014/QH13) of Vietnam, Trade Union Law (Law No.12/2012/QH13) of Vietnam, Law on Children (Law No.102/2016/QH13) of Vietnam and the Labor Law of Vietnam (Law No. 45/2019/QH14), etc.

Combined with the actual operation of the Group, we have formulated the "Recruitment Management Regulations", "Employee Change and Resignation Management Measures", "Labor Union Management Measures", "Employee Welfare Management Measures", "Employee Overtime Management Measures" and "Employee Holiday Management Measures". "Regulations on Attendance Management", "Administrative Measures for the Protection of Female Workers", "Administrative Measures for Prohibition of Discrimination", "Employee Incentive Procedures", "Labor and Moral Risk Assessment and Risk Management Procedures", "Administrative Measures for Child Labor and Juvenile Workers", "Prohibition of Harassment or Abuse Control Procedures" and other employee management policies, which regulate the relevant human resource management policies including remuneration, recruitment, dismissal, promotion, working hours, holidays, benefits, code of conduct and professional ethics.

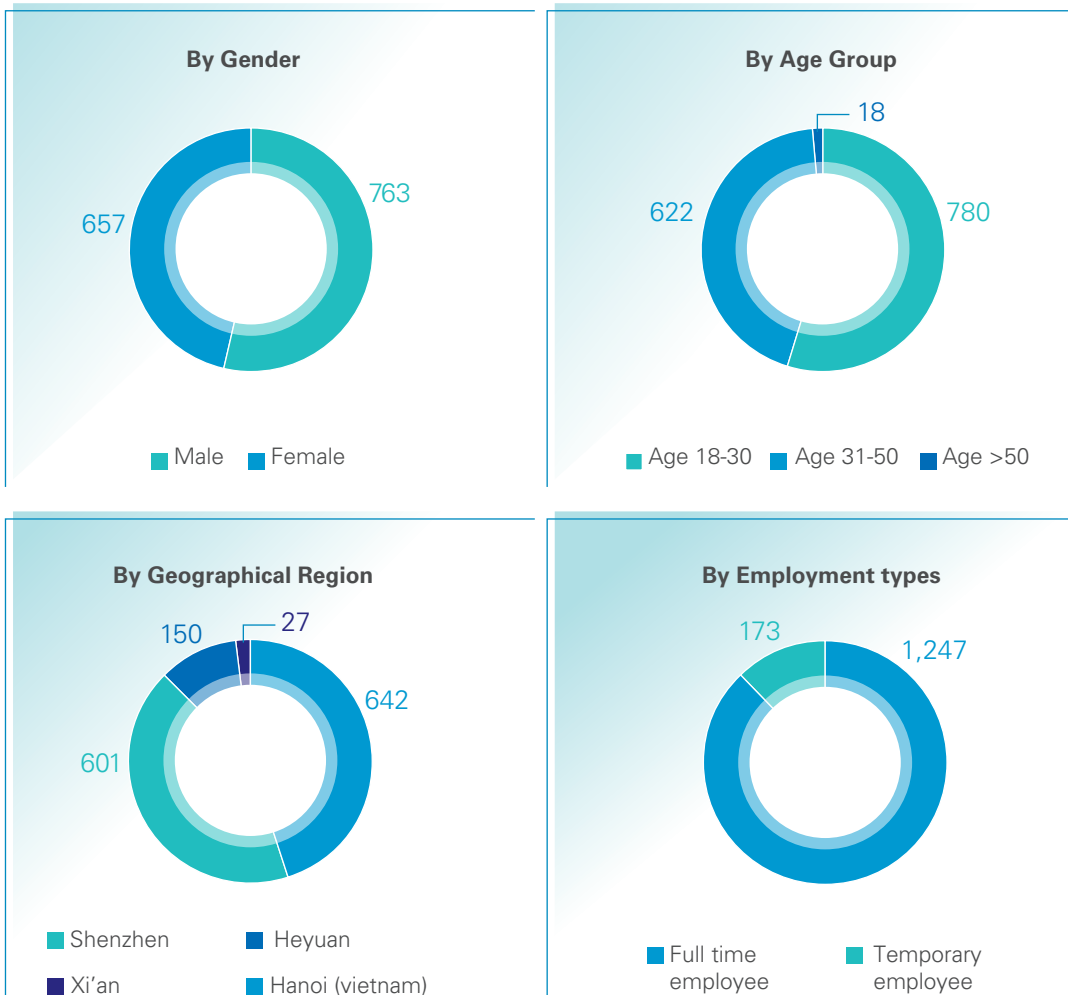

There are no relevant laws and regulations relating to compensation and dismissal, recruitment and promotion, working hours, rest periods, equal opportunity, diversity, anti-discrimination, benefits and welfare, and preventing child and forced labor the compliance with which have a significant impact on the Group.

# Environmental, Social and Governance Report

Set forth below is the Group's staff composition in the PRC and the Vietnam as at 31 December 2021:

## Total Number of Employees: 1,420

# Environmental, Social and Governance Report

## Employee turnover rate

Types	category	Year 2021		Turnover rate (%)
		Number of employee on list	Number of employee turnover	
Number of employee		<b>2,450</b>	<b>1,030</b>	<b>42.02</b>
By gender	Male	<b>1,370</b>	<b>607</b>	<b>44.31</b>
	Female	<b>1,080</b>	<b>423</b>	<b>39.17</b>

	Hanoi, Vietnam	<b>1,133</b>	<b>491</b>	<b>43.34</b>

### Note:

1. In 2020 only the number of registered employees at the end of the period is reported, and from 2021 onwards, the number of employees registered for the whole year is also reported.

# Environmental, Social and Governance Report

## Labor Standards

The Company strives to be a responsible employer and the Group is committed to implementing good employment practices, and advocates ethics and human rights at the workplace.

### (a) Practices on Recruitment Process

The Group recruits employees through the open market with equal opportunities. Its employment standards are fair and equitable. During the recruitment process, it focuses on job applicants' business ability, personality and development potential, and never treat them differently based on age, gender, ethnicity, nationality, marital and family status, health status, and religion. The Group prohibits discrimination against potential candidates on the basis of their race, color, religion, sex and gender identity/sexual orientation, age, marital and parental status, and/or pregnancy or medical conditions in the recruitment process.

The Group does not hire any persons aged below 18. During the recruitment process, job applicants will be requested to produce identity proof to ensure compliance with the Group's policy as stated above. The Group has also formulated other policies to clearly prohibit child labor, established a confidential and anonymous complaint mechanism and regularly reviews the procedures of recruitment agencies to ensure the verification of the age of their employees as a standard process and makes it a selecting criterion of agents. If job application of child labor is found, the Group will communicate with its legal guardian and arrange handling methods. If there is illegal behavior, platforms for reporting to management are established within the Group, for example, employees can report in person or by e-mails. In addition, the Group ensures that employees are aware of their own rights and interests and prevents forced labor by specifying working hours, content, location, dismissal matters and vacation arrangements in employment contracts.

During the Year, the Group had no incident of discrimination, use of child labor or forced labor.

The Group makes constant assessment and adjustment in labor employment in light of the Group's economic performance. Employee who is dismissed due to the Group's human optimization program will be compensated according to the Labor Law of the PRC or Labor Law (No: 45/2019/QH14) in Vietnam.

### (b) Practices on Remuneration and Promotion

The Group recognizes its employees as its greatest assets. In order to attract, motivate and retain talents, the Group offers competitive remuneration packages. The remuneration of each employee will be determined with reference to a number of factors including educational background, experience, job duties, professional skills and technical capabilities, as well as salary level for similar job positions in the industry. The Company has also adopted the share option scheme upon listing of the Company's shares on the Main Board of the Stock Exchange, under which employees of the Group are, based on management's evaluation of their individual performance, eligible to be granted share options as incentives. The Group adopts an open-door communication policy and carries out annual review with its employees on their performance, during which process each employee is given equal opportunity for promotion. The Group's employees are provided with a clear career path with opportunities for additional responsibilities and promotions.

# Environmental, Social and Governance Report

## (c) Practices on Working Hours and General Welfare

The resting time of the Group's employees is well respected and the employees are also entitled paid holidays pursuant to statutory requirements. Under normal circumstances, the regular work week shall not exceed 48 hours. The Group shall allow employees at least 24 consecutive hours of rest in every week. All overtime work shall be consensual. The Group shall not request overtime on a regular basis and shall compensate all overtime work at a higher rate as required by the Labor Laws of the PRC and the Vietnam or otherwise under their respective employment contracts. There is a computerised attendance registration system in place to continuously monitor the working hours of the employees. During working hours, the employees' personal movements are not restricted in any way. By reviewing the working hours of the employees, the Group strives to ensure that no forced labor is being used in the Group's business operations. The Group also adopts a no-violence policy towards sexual harassment at the workplace to protect its employees from unsolicited sexual advances.

Besides, the Group also makes statutory pension scheme contributions for the benefit of employees in accordance with the relevant legal requirements.

To enhance overall morale of its employees, the Group also organises company events such as New Year Party, lantern riddles guessing on Mid-Autumn Day, Departmental team outdoor activities and afternoon tea gatherings, etc. to allow the staff members to gather outside of work for bonding and team-building.

### Summaries of Employee Welfare

## Health and Safety

The Group is committed to providing a safe working environment to its employees. The Group has adopted an internal framework to assist the Group in identifying and controlling health and safety risks and reducing workplace injuries which complies with the relevant laws and regulations in the PRC and Vietnam, including but not limited to:

- (i) The work Safety Law of the PRC, Laws of the PRC on Prevention and Control of Occupational Diseases, the Fire Control Law of the PRC and Regulation on Work-related Injury Insurance of the PRC, and
- (ii) Law on Occupational Safety and Health (No: 84/2015/QH13), and Labor Law (No: 45/2019/QH14) in the Vietnam.

The laws mentioned above deals with occupational hygiene and safety assurance, policies and benefits for victims of occupational accidents and occupational diseases.

# Environmental, Social and Governance Report

---

Based on the relevant laws and regulations, in order to reduce safety risks, the Group have formulated and implemented the "Safety Production Responsibility Policy", "Fire Safety Management Policy", "Production Safety Management Policy", "Occupational Health and Safety Management Policy", "Safety Hazard Investigation and Management Policy", "Safety Training Policy", "Production Safety Accident Emergency Rescue Plan", "Emergency Response Plan for Employee Sudden Illness and Work Injury" policies.

During the Year, the Group strictly complied with the above-mentioned laws and regulations, and there was no material violation of health and safety laws and regulations. There are no relevant laws and regulations relating to providing a safe working environment and protecting employees from occupational hazards the compliance with which have a significant impact on the Group. In addition, the Group has not experienced any major safety accident and there has been no work-related fatality accident in the past three years (including this year). In 2021, there was six days lost due to work injury (2020: four days).

Listed below are some of the measures that the Group regularly practices in accordance with applicable local workplace safety regulations for reducing the accidents rate of workplace:

- Providing health checks to its staff members as appropriate prior to commencement of employment and during the employment
- Streamlining production process on a continuous basis and reducing/eliminating the use of known hazardous substances in the Group's manufacturing process to the extent practicable
- Employing certified contractors for regular inspection of fire safety equipment
- Providing personal protective equipment and other safety equipment at the workplace
- Supervising and providing specific technical training and protection supplies to staff members who may come in contact with potentially hazardous substances
- Prohibiting smoking at the workplace, factory quarters and dormitories
- Providing safety training to staff members every year
- Conduct emergency drills at least 2 times a year in the case of fire or other hazards
- Regular cleaning of the water supply filters and daily garbage removal
- Conduction of safety checking 2 times a week

In addition, in the face of the COVID-19 epidemic, the Group actively fulfilled its prevention and control responsibilities, and compiled the "Emergency Plan for the Prevention and Control of Pneumonia Infected by COVID-19" for employees. We are committed to safeguarding the health and safety of our employees and have taken appropriate measures, including:

- Posting posters and distributing brochures, educate employees about the protection knowledge of COVID-19;
- Organizing epidemic prevention and control training;
- Distributing protective masks to employees, requiring employees to maintain social distancing, and to wash hands properly and frequently;
- Check the temperature of employees when entering the company entrance;
- Conduct comprehensive disinfection in the workplace, including sanitising of office areas and incoming goods.

## Development and Training

Considering its employees to be indispensable to the Group's business achievements, apart from safety related training as mentioned above, the Group also provides both internal and external training programs to its employees regularly with a view to enhancing their work quality and personal development. To this, we have formulated the "Training Management Regulations" and set up an annual training plan to provide employees with appropriate training. Such training covers topics such as:

- Orientation to Sky Light — training programs are held for new employees
- Product knowledge enhancement — training programs are held on a regular basis to familiarise its staff with the Group's products
- Market updates — staff members are brought abreast with technology development and market conditions of the electronics industry
- General training — general systems of the Group and specific systems of individual departments
- Management systems training
- Management and communication techniques training
- Safety production, environmental protection and other compliance training

## Development and Training Performance Summary

key performance indicators	Year 2021	Year 2020
<b>Percentage of employees trained (total percentage)</b>	<b>97%</b>	98%
<b>Percentage of employees trained by gender</b>		
Female employees	<b>44.52%</b>	49.52%
Male employees	<b>55.48%</b>	50.48%
<b>Percentage of employees trained by employee category</b>		
Junior employees	<b>92.89%</b>	95.56%
Intermediate management	<b>6.49%</b>	3.47%
Senior management	<b>0.62%</b>	0.97%
<b>Average training hours completed per employee by gender</b>		
Female employees	<b>3.75</b>	4.04
Male employees	<b>3.51</b>	4.88
<b>Average training hours completed per employee by employee category</b>		
Junior employees	<b>3.61</b>	4.51
Intermediate management	<b>3.86</b>	3.53
Senior management	<b>1.75</b>	3.20

### Notes:

1. Percentage of employee trained of each type = number of employee trained of each type / total number of employee trained \*100%
2. The average number of training hours completed by each employee in type-X = the total training hours of type-X employees/the total number of type-X employees.

# Environmental, Social and Governance Report

## SOCIAL RESPONSIBILITY OPERATIONAL PRACTICES

### Supply Chain Management

To ensure the Group's product quality, its raw materials and products procurement policy is to select only those suppliers on an approved list who have passed the Group's quality control tests and have a satisfactory record of quality and on-time delivery. The Group also practises ethical procurement and targets to source raw materials from socially responsible suppliers. To achieve this, we have established the "Supplier Management Measures", formulated the "Quality Record Control Program" and "Purchasing Control Program", and conducted monthly assessments and annual on-site audits for suppliers.

All personnel with supply chain management responsibilities are trained to ensure, to the extent practicable, that selected suppliers are legally compliant in respect of materials and products provided to the Group, especially with respect to compliance with laws against slavery and human trafficking, and other employment — and environment-related laws. Conformity by suppliers with the relevant industrial standards and ethical business norms in their supply of materials and products to the Group is one of the supplier selection criteria that the Group takes into account. Suppliers' fulfilment of the environment, health and safety requirements of the Group are relevant factors which will be taken into account by the Group in its supplier selection process.

Apart from continuously monitoring the quality of products and materials procured under quality assurance agreements entered into with suppliers, the Group will also review suppliers' environmental and social responsibility-related practices annually through, for example, site inspections and interviews. The Group's management will review the procurement process and may source materials/products from alternative suppliers when a supplier has been identified by the Group to have deficient environmental and social responsibility practices and has not made any improvement upon request.

#### Supply Chain Management Performance table

Key Performance Indicators	Year 2021	Year 2020
Total number of suppliers	537	516
<b>Number of suppliers by region</b>		
China	520	501

Total number of suppliers for sustainability management Review	93	238
Review pass	88	200
Unable to pass	5	38

# Environmental, Social and Governance Report

## Product Responsibility

The Group has put in place a sound quality management system. All our products are subject to thorough and comprehensive testing to meet customers' requirements and international standards. The Group strictly complied with the Product Quality Law of the PRC, Industrial Product Quality Responsibility Regulations, Internet Security Law of the PRC, Consumer Rights Protection Law of the PRC, Advertising Law of the PRC and Law on Product and Goods Quality (Law No. 05/2007/Qh12) of Vietnam and other related product laws. There are no relevant laws and regulations relating to health and safety, advertising, labelling and privacy matters in connection with products and services provided the compliance with which have a significant impact on the Group. The Group has also established management policies for product health and safety, advertising, labeling and privacy issues, and formulate clear quality control and finished product management. For example: "Advertising Management Control Program", "Non-conformity and Corrective Actions", "EICC Manual", "Intellectual Property Protection Program", "Incoming Material Inspection Control Program", "Outgoing Quality Management Program", "Customer Complaint Operation Guide", "RMA Customer Return Handling Procedures".

In addition, the group has obtained the ISO9001:2015 Quality Management System certificate, established and implemented the "Guidelines for Customer Complaints" to ensure the protection of consumers' rights and interests, and regularly conducts satisfaction surveys on major customers.

The Group has devised a stringent materials specification and implemented internal standards to ensure that the use of hazardous substances in the manufacturing of its products is reduced or eliminated to the extent practicable. To ensure adherence to this policy, the Group conducts periodic assessment through internal quality assurance department or third-party inspection agencies on all products manufactured by it against international standards and other benchmarks prescribed by applicable legislation such as the European RoHS (Restriction of Hazardous Substances Directive), IATF16949: 2016 (International Automotive Task Force), REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) standards and HAF (Halogen — and Antimony-Free) standards. The assessment covers the entire product lifecycle from the research and development phase to customer sale and product waste disposal.

The Group's suppliers also entered into quality assurance agreements regarding control of hazardous substances and their adherence to the assurance undertakings is also a factor taken into account at the Group's annual review as a part of its supply chain management.

In terms of advertisements, product description and labelling, as the Group's products are self-manufactured or sourced from third-party suppliers in accordance with the customer's order and detailed specifications regarding the product are set out in the respective agreements/purchase orders with the customers, or are otherwise available upon customer's request, its product packaging can therefore maintain a relatively simple design.

The Group values customers' feedbacks and complaints, which serve as an important reference to improve and enhance product quality and corporate competitiveness. The Group has a set of rules and procedures designed for managing customers and product complaints, which are handled by sales department. Customer feedback in the course of product development is usually addressed in a timely manner. In addition, the Group will invite customers to fill in the "Customer Satisfaction Survey" via email every six months. By establishing customer communication and feedback channels, the Group obtains and understands customer satisfaction with our products and services on a regular basis.

# Environmental, Social and Governance Report

In case the Company receives customer’s request to return the product, we follow the “RMA Customer Return Handling Procedure” and adopt the following Eight disciplines problem solving method(8Ds) to deal with the recall procedure:

- D1 Establish the professional team by technology and quality department
- D2 Investigate the cause, define and describe the problem
- D3 Implement interim containment actions
- D4 Determine and verify root causes
- D5 Confirm permanent corrective action for the problems
- D6 Implement permanent corrective action
- D7 Take preventive action
- D8 Issue an 8Ds report to the customer and keep record for subsequent traceability

## Major Customer Satisfaction Survey

Key Performance Indicators	Year 2021	Year 2020
Number of questionnaires issued (customer/copy)	7	9
Number of questionnaires returned (customer/copy)	7	9
Satisfaction target value	≥90	≥90
Average Satisfaction of Major Customers	92.5	91.6

In order to fulfill product responsibility, the Group actively communicates with suppliers, employees and customers, and prevents any product defects through quality assurance and monitoring measures such as safety testing, performance testing and reliability testing. In addition, the Group places clear warnings or reminders in conspicuous places on the packaging of products and goods.

During the Year, the Group has no product recovery, complaints or quantity return due to safety and health, advertising and labelling.

We also strictly safeguard corporate confidentiality, customers’ confidentiality and our employees’ privacy, and have established guidelines for intellectual property protection and confidentiality. In addition, we have implemented strict IT security policies, factory access control systems and documentation access authorization procedures to safeguard the confidentiality and privacy.

The below sets out a few examples of the practices adopted by the Group in relation to safeguard the confidentiality and privacy.

- There are entrance guards and security station at the main gate of the factory, and no unauthorized person is allowed to enter.

# Environmental, Social and Governance Report

---

- Employees must wear the identification card when entering the factory.
- All visitors (including customers, suppliers, and applicants) must make an appointment or be brought into the factory by a dedicated person, and verify and register their identity information.
- Without the management approval, no person shall take photographs in sensitive or confidential area in the factory;
- Network and computer equipment set up security measures and encryption.
- Important systems and sensitive data are stored in a stand-alone environment, and document server access control measures are established to prevent unauthorized access.
- The Group signed a confidentiality agreement with internal employees. Without the management approval, all of the confidential information (including personal information of customers) shall not be copied and provided to any third party. The Group instructs its employees to exercise strict standards of care in handling the personal information of customers and remind them of their obligations with regard to the confidentiality of customer information. The use of the information is restricted for the purpose consistent with those identified in the contracts to ensure the information is used in a responsible and non-discriminatory manner.

During the Year, there were no reported cases of claims of breach of confidentiality and privacy. In addition, no non-compliance with relevant laws and regulations relating to health and safety, advertising, labelling and privacy matters regarding products and services provided and methods of redress had been identified.

## Anti-corruption Practices

Conducting business with integrity is one of the core values underlying the Group's business operations and the Group believes an effective anti-corruption mechanism is the cornerstone for the sustainable and organic growth of the Group. In compliance with the Company law of the PRC, the Audit Law of the PRC, the Anti-Money Laundering Law of the PRC, the Criminal Law of the PRC, the Anti-Unfair Competition Law of the PRC, and the Interim Provisions on Prohibition of Commercial Bribery and the Vietnam Anti-Corruption Law (Law No. 36/2018/QH14) and other relevant laws and regulations, the Group regularly inquires about local laws and regulations and establishes a list and conducts compliance obligation evaluation on the list of laws and regulations on a regular basis. In addition, an independent third-party organization reviews the Group's laws and regulations list and compliance obligation evaluation to ensure that the operation of the group strictly abides by the current laws and regulations.

The Group has adopted and circulated internally clear guidelines for employees, establish and implement the "Integrity and Transparent Management System" which strictly prohibit bribery, extortion, fraud, money laundering and other acts such as gambling and personal loans with persons having business relationships with the Group, misappropriation of the Group's assets, inappropriate charitable donation or sponsorship, unlawful solicitation of business or favourable treatment, provision or acceptance of "kickbacks" or unreasonable gifts, entertainments or other improper benefits, etc. and require its personnel to declare any interests in the Group's business partners, suppliers and advisers that may conflict with the Group's business interests.

# Environmental, Social and Governance Report

---

The Audit Committee has established and oversees a whistleblower policy and a set of comprehensive procedures whereby employees, customers, suppliers and other concerned parties can report any actual or suspected occurrence of improper conduct involving the Company, and for such matters to be investigated and dealt with efficiently in an appropriate and transparent manner. The Audit Committee has designated the head of Group Internal Audit to receive on its behalf any such reports, to oversee the conduct of subsequent investigations, and to provide information, including recommendations for action resulting from investigation into complaints.

Employees are also required to comply strictly with applicable laws relating to the above acts which regulated by the jurisdiction where the Group's subsidiaries operates. It is also a term under the Group's standard employment contract that legal non-compliance will constitute a ground of termination of employment. The Group also expects its suppliers and business partners to similarly abide by the relevant local anti-corruption laws.

In order to strengthen corporate integrity and governance, the legal department of the Group regularly provides anti-corruption training to directors and employees through the publication of integrity training videos and corporate WeChat integrity announcements, including anti-corruption and bribery, anti-employment, anti-money laundering, etc.

There are no relevant laws and regulations relating to bribery, extortion, fraud and money laundering the compliance with which have a significant impact on the Group.

During the Year, (i) the Group has not received any complaint or notification from governmental authorities regarding non-compliance of the Group or its employees with anti-corruption laws referred to above; (ii) there does not exist any concluded legal cases regarding corrupt practices brought against the Group or its employees; and (iii) no non-compliance with relevant laws and regulations relating to bribery, extortion, fraud and money laundering had been identified.

# Environmental, Social and Governance Report

## Community Participation

The Group firmly believes that community support is critical to the Group's success and our social engagement program focuses on social welfare and health. During the Year, the Group participated in organizing community services by subsidizing employees with financial difficulties and donating public welfare funds to the society.

This year, the Group donated VND250 million (approximately HK\$85,000) to the COVID-19 Vaccine Fund for supporting medical staff in their fight against the novel coronavirus epidemic.

### subsidizing employees with financial difficulties

Looking to the future, the Group will continue focusing to our core value of promoting sustainable development goals. The Group encourages and enables our employees to contribute to the community through donations or volunteering.
